

Wi-Fi Network Connection

This document provides instruction for Staff on connecting to the Unitec WiFi network. It has sections for both Android and iPhones.

ANDROID DEVICES

1. Tap **Settings > WiFi**
2. When Wi-Fi is on, your device will automatically search for available Wi-Fi networks.
3. **Tap** the network to connect (e.g. UNITEC-ELEARN) from the list of networks
4. You will be prompted for the following information:

EAP Method:	<i>Leave as default (PEAP)</i>
Phase 2 authentication	<i>Leave as default (None or MSCHAPV2)</i>
CA Certificate:	<i>Leave as (unspecified)</i>
User Certificate:	<i>Leave as unspecified)</i>
Identity:	<u>Enter Your Unitec Username</u>
Anonymous identity:	<i>(Leave Blank)</i>
Password:	<u>Enter Your Unitec password</u>

5. Tap **Connect**

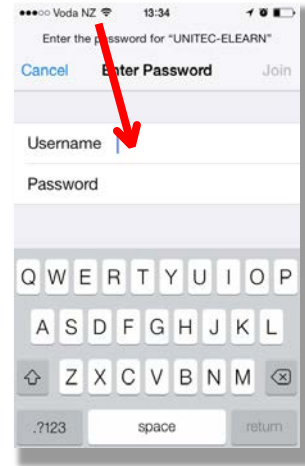

When your device is connected to UNITEC-ELEARN, the network will show as “connected”.

IPHONES

1. Tap **Settings > Wi-Fi**. When Wi-Fi is **On**, your device will automatically search for available Wi-Fi networks.
2. Tap to select (e.g. UNITEC-ELEARN) from the list of networks

3. You will be prompted to Enter Password: Enter Your **Unitec Username and Password**
4. Tap **JOIN**

5. The following warning will display, tap **Accept**

When your device is connected to UNITEC-ELEARN, a tick will appear to the left to confirm you are connected.
