

# **PRESENTS** **DR. CARALYN KEMP**

Lecturer/Researcher

Unitec Institute of Technology

## **BEHAVING AT THE ZOO**

Zoos are constantly balancing visitor experience and conservation outcomes with good animal welfare.

Understanding which compromises are justifiable is essential to ensuring the best possible outcomes on both sides, yet have been the subject of little study.

In this seminar, I will discuss two aspects of my research in this area of human-animal interactions in zoos: donation-giving behaviour and naughty (!) visitors.

**ALL WELCOME**  
**1PM TO 2PM**  
**MON 1ST APRIL**  
**RM 115-2005**
