

Question

As a committee member, how effective is your oversight of academic quality and student success at Unitec?

Member Responses

Example Response

Alice Acorn

My oversight is 20/20!!!

(First response from here, thanks.)

Toni Rewiri

I am very appreciative of the important work being completed by Te Korowai Kahurangi to ensure we are tracking and monitoring academic quality. The risk register has been an excellent addition and whilst it's still being refined, gives us an "at a glance" understanding of the risks and the steps we are undertaking to minimize as necessary. In terms of overall student success, we have Priority group Directors reporting in, with a Student Success report recently added. Given recent Māori EPI data, it will be important for me to highlight the data more regularly to AB, to maintain our oversight as we progress towards our 2022 parity target

The feedback from the ELT panel session suggests that there is opportunity to develop our ability as a group to evidence our effectiveness to ensure academic quality and student success at Unitec.

I am up to date with Pacific stats as the Power BI Dashboard is great for keeping me updated. I probably need to do a better job at communicating this with the wider Academic Board.
